- ▶ *Mediseal[®] Footswitch Covers offer proven protection, reduced surgical downtime and lower repair costs.*

MEDISEAL[®] FOOTSWITCH COVERS

► The Mediseal[®] drawstring makes the footswitch covers easy and fast to secure, **saving time** and **reducing worry**. Just slip the footswitch into the cover, tighten the drawstring, loop it around the neck of the cover and tie it with a simple knot.

The clear, durable Mediseal[®] plastic cover makes footswitches easy to see and even easier to use. The covers are proven to withstand the stress of repeated foot action.

Your equipment works day in and day out, reducing footswitch failure and the resulting costly delays and frustration in OR scheduling.
